“ FOREWORD FROM PRESIDENT ”

”

CARE INDIA
WELFARE
TRUST

The year 2017 -2018 was yet another “remarkable year” for us when we kept walking ahead with greater momentum to bring the socially rejected children under the boundary of our programmes on health, education, protection and humanitarian response. We are on a steady growth path and the strength of our efforts to reach the most underprivileged and marginalized children increases every year. Going by the mantra that “**We Care for a Better world**”,

After half a decade of “Care India welfare trust” existence, we have reasons to be happy. We started with just five students and a teacher. Today, more than 5000 children has undergone training through our two vocational & learning Centers so far since our inception. It has nearly more than 500 women who have taken entrepreneurship training in our learning center with the help our channel partner MSME (Ministry of Micro, Small and Medium Enterprises) These women have started entrepreneur project from running Sewing Center to manufacturing Jute Products like jute bags, various jute crafts. As this report details the various projects that we have undertaken during the year, some significant Achievement this year was our participation in IITF (INDIA INTERNATIONAL TRADE FAIR), women who have gone through our entrepreneurship training earlier were given a platform to showcase their skills by exhibiting various handicrafts product made by them, We have also participated in International Excellence Awards 2018 and awarded as the Best Emerging Ngo in Delhi & NCR. At the International Excellence Awards, organizations and professionals from different fields are awarded for their outstanding efforts and setting exceptional levels of excellence.

It is our duty to thank the community, staff, governance structures, donors, corporates, governments, foundations, trusts and well-wishers of CARE INDIA WELFARE TRUST for the support and guidance extended to us. Let God Almighty bless each one who participated in this benevolent act of promoting well-being of the marginalized, restoring their rights and enabling us to progress in Nation Building exercise

With faith and
gratitude,
Mahinder
Dobriyal
President
Care India
welfare trust

THANK YOU !

P.S: Do write to me at info@careindiawelfaretrust.org with your thoughts and feedback.

Vision

" A prosperous, harmonious and peaceful Society where which each individual lives with Identity, Dignity, and Respect."

Mission

- ◆ we are established to provide Quality Education to under privileged Children and Women
- ◆ Care India Welfare Trust's Educational Plan includes:
 - ◆ Basic Education to the children in the age group of 3-5 years.
 - ◆ Pre-school, Nursery and Kinder Garden Classes for children between the age of 3-6 years.
 - ◆ Providing Non Formal Educational Classes for Drop outs between the age of 8 to 15 years.
 - ◆ Vocational Courses for age group of 14 to 18 years.
 - ◆ Providing Education and organizing courses for Women of all age group
- ◆ We are devoted in providing health assistance to the deprived class of society through various health care programmes by organizing medical camps, supporting small medical centers already in existence. These health care programmes will primarily focus on all those who are not able to get proper treatment of their diseases

PROJECT

LIGHT OF WISDOM

THE OPPORTUNITY TO LEARN

CIWT's flagship programme LIGHT OF WISDOM provides basic education, healthcare and nutrition support to socio-economically disadvantaged children living in urban unreached slum areas of our national capital. The programme was initiated in 2013 with the belief that whether we are addressing healthcare, poverty, population control, unemployment or human rights, there is no better place to start than in the corridors of education.. In India 8 million children are out of school. CIWT believes that the long march for national development starts with the first step of every child across the School gates .

More than **500** children's
enrolled in our learning center 2017-2018

REMEDIAL EDUCATION

SCOPE

Project light of wisdom is designed to work at three levels

- 1) bringing non-school going children into formal schooling -majority being first generation learners and school dropouts
- 2) enabling school going underprivileged children to achieve grade level learning norms
- 3) Providing pre school education for toddlers from families in difficult circumstances so as to ease transition to the formal school system

Pre school education

3-6 years

Non-Formal Education

6-14 years non -school going

Remedial Education

6-14 years school going

Under project Light of wisdom we work with underprivileged children under difficult circumstances such as child labour , children of poorest of the parents , street and runaway children ,differently abled children ,disaster struck children and slum children .we inducts such children usually in the age group 5-18 years through non formal education ,remedial and bridge courses,subsequently mainstreaming them into the formal school system. The program provides intensive coaching to such children,aiming to help them rejoin formal schooling in a class relevant to their age groups.

we take care of their educational requirements, providing not only academic support that enables them to define success of their schooling experience but also material support

This includes uniforms,books,school bags,shoes,socks and other stationary requirements etc.to enable them to go to school with eagerness to learn more.The material kit is ceremoniously handed over to each child at the beginning of the academic year

computer aided learning is being introduced at our centers in a phased manner.

Children from our educational centers celebrate with their friends at the center on being mainstreamed into formal educational system

Health Camp in progress at our center in Delhi.

PROJECT LIGHT OF WISDOM

PROGRESS THIS YEAR

The inclusion of nutrition support within the programme has highly encouraged parents to send their children regularly to our vocational center. For the parents, who have to struggle hard every day to provide two square meals to their children, the provision of nutritious food is motivating enough to send their kids to our center.

Focus on the physical and mental well being of the children has also been augmented through periodic medical check-ups and quarterly health camps conducted for the children at all our Education centres. Living in congested slum clusters amid extremely unhygienic conditions, the children are left vulnerable to a number of diseases and infections, with little or no access to even basic healthcare facilities. These health camps provide medical aid and hygiene awareness for many of these children.

Emphasising on quality education, teachers at our Education centres have been provided extensive training throughout the year to make classroom sessions more engaging and effective for the first generation learners. Specially created books, innovative teaching learning material, scientific equipments and digital learning tools have been distributed among the children to enhance their holistic development.

Regular counselling of parents and community members has been a year-round activity, thus bringing about a significant growth in awareness amongst thousands of families. This has led to a marked increase in enrolments and retention of the currently enrolled children at our Education centres around the country.

216

EDUCATION

FOR THE CHILDREN OF
WAGE WORKERS IN
DELHI SLUM

The centre is now not only well-accepted and appreciated by the community; it has been adopted by the community members, who actively participate to make the initiative a success. Regular meetings are held where the community leaders discuss ways to improve the centre. The children are leading this movement of change, and some of them have now even started transferring their knowledge to families

At the heart of our national capital, lies chunna bhatti slum just at the backside of india's biggest furniture market, Kirti nagar. New Delhi. The Children here never had a normal childhood. Even as kids they were carried along to the factory sites by their parents, and when they became old enough to stand, they had already joined work at the quarries to add their share to the family income.

But with relentless hard work, playful and engaging teaching methods, activity-based learning, provision of routine health check-ups, nutrition, exposure visits and a lot of devoted attention, things are changing now

More than 500 children are currently enrolled at the centre and willingly attend classes on a regular basis. Their parents take great care not to miss any of the parents-teacher meetings and take a lot of interest in their children's academic progress. Regular health and hygiene camps are organised under the project for not just the children, but their parents also. Working in hazardous circumstances day and night, the community is often left vulnerable to several health risks. Health camps and awareness sessions keep a check on the spread of preventable and communicable diseases, along with promoting a health seeking behaviour in the kids from an early age.

In India 20 per cent of children under five years of age suffer from malnutrition . More than one third of the world's children who are suffering from malnutrition live in India.Malnutrition among children is one of the major problems of our country. To mitigate this problem, CIWT nutrition programme has been providing both direct nutrition interventions and a broad range of "nutrition sensitive" interventions addressing the determinants of malnutrition

The project has been designed to address the issue of malnutrition and enable behavioural change regarding proper child care and dietary practices within existing family budgets in two phases:

- Nutrition Support: Catering to nutritional needs of the underprivileged children,
- Nutrition Awareness: Sensitizing the underprivileged communities for proper intake of nutrition through various awareness program and group discussion

Street plays highlighting importance of nutrition and combating malnutrition were organised to spread awareness among-st communities

Parents and children were given knowledge on healthy eating habits, meal planning, infections,food sanitation and unsatisfactory feeding practices by dietary experts

Poster/Painting/Story Writing/Essay Writing competitions on healthy eating habits were conducted amongst children of all ages

Hand washing awareness campaign was conducted as a step ahead in encouraging hand hygiene among the children

EDUCATIONAL TOUR

A basic principle of the Project is to enable kids to relate textbook learning with everyday life. Study tours and outings are arranged regularly which enables them to make these connections. Apart from the educational inputs, outings bring a sense of adventure and fun into learnings. That is why educational tours becomes an integral part of Project. One Educational tour is organized once every six months. We conducted the first trip in aug 2014 .since then ,in these trips we take kids to different fairs,museum & planetariums twice a year.

100+

SCHOLARSHIP PROVIDED

1000+

STATIONARY DISTRIBUTED

THE IMPACT

More than 100 school dropouts resumed education underbridge course

60% of the total beneficiaries were girls, parents outlook toward girl child education has been changed positively through various counselling session

More than 12 health camps were conducted to cater to healthcare needs of children

More than 1000 stationary items distributed among underprivileged

SKILL DEVELOPMENT

COMPUTER LITERACY MODULE

YOUTH TRAINING STATS

Computer literacy is the knowledge and ability to use Computers and Technology efficiently. The precise approach of CIWT lies in making youth & children skilled in computer literacy through six months computer course which is based on government guidelines and meets all professional requirements.

Our goal is to provide vocational job oriented training to the underprivileged children and girls. When a girl return home with the ability to stand on her own feet, it improves the perception of the girl child in her neighborhood and also inspires other girls and women to make themselves skillful creating such examples of skillful which is a better way to inspire, in spite of million pamphlets and dozens of talks .They gained skills and confidence through our computer training program to attain successful placements in reputed offices .

CAREER COUNSELLING

Every student in our centre has their own set of personal strengths and skills. The main aim of including the aspect of career counselling is to help students choose a field that is in tune with their skills and their job expectations and offer the right career guidance to the students. Career counselling has proved beneficial in terms of providing new directions to the students and boosting the confidence of the students. Students can now discuss in details about the new job trends, the variety of choices and make a more informed choice.

PERSONALITY DEVELOPMENT

The aspect of Personality Development has been made an integral part to curtail the hindrances that stand in the way of expression of individual personality. The inclusion of the subject has helped trainers in inculcating positive qualities like punctuality, flexible attitude, willingness to learn, and many other positive attributes, among the students. The youth are trained to socialise and be responsible for their actions and develop a positive mentality towards their duties which is very important to sustain in a professional world.

ENGLISH SPEAKING MODULE

Touching lives through English language

The ability to speak English provided a huge number of opportunities for employment and was also a socially important skill in India. Since the launch of English Speaking Module, we have trained more than 1000 learners. Baseline assessment tests are held to assess the current levels of English. The textbooks and workbooks with ample exercises along with intensive chat session give the children an opportunity to inculcate an interest to learn the language.

THE IMPACT

Out of the total youth enrolled in our Vocational center 80% successfully completed training and received certificates of accomplishment.

60% of the total beneficiaries were girls.

career counselling sessions were conducted by in house as well as with industry experts

There was an overall increase of 25% from last year in enrolment at our vocational centres

BUILDING LIVELIHOODS

PROJECT - SASHAKT NARI

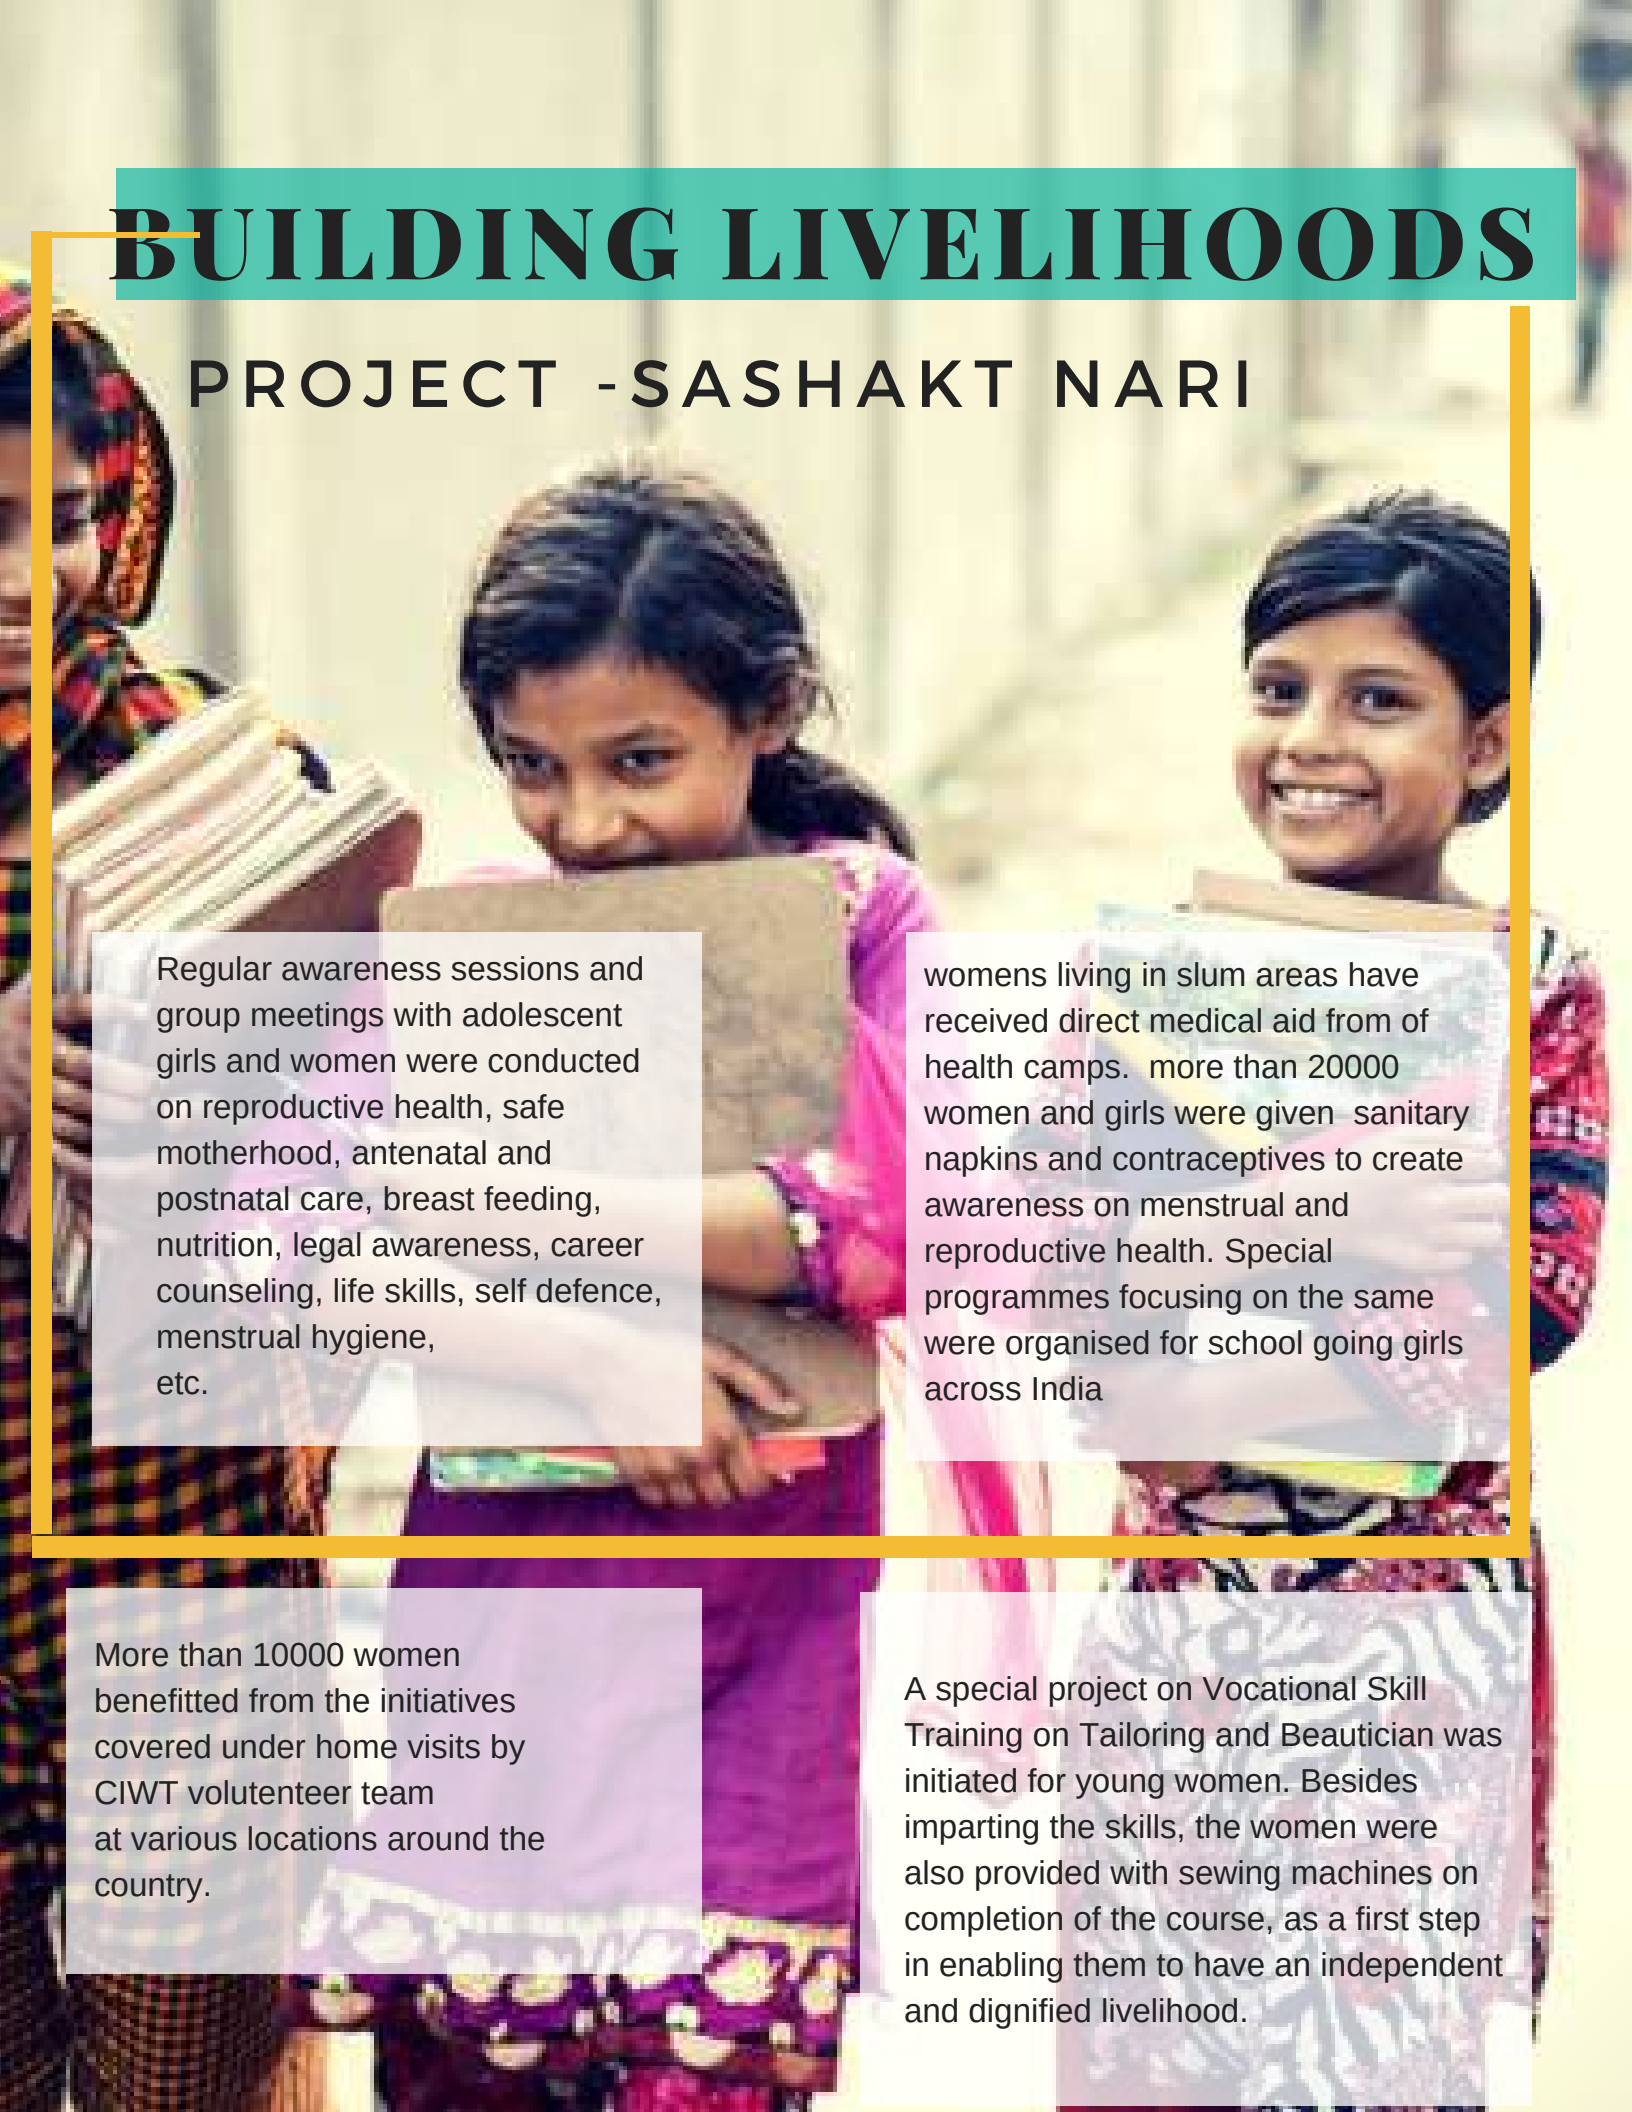

We strongly believe that women should have equal socio-economic, cultural and political opportunities as men. With this ideology in mind, a successful attempt was made to empower women of the slum. We provided them with vocational training of sewing which is relevant to their needs and provides them value added skills to help them earn additional income for their families.

Women Vocational Studies & Women Empowerment can be the most important catalysts for change in their kids lives. Women have the power to help & boost entire family when in need. By strengthening women we are actually strengthening roots to a better society.

BUILDING LIVELIHOODS

PROJECT - SASHAKT NARI

A photograph of three young girls in school uniforms. The girl in the center is looking down at a book she is holding. The girl on the right is smiling and looking towards the camera. The girl on the left is partially visible, also looking at a book. They are all holding books and appear to be in a classroom or library setting.

Regular awareness sessions and group meetings with adolescent girls and women were conducted on reproductive health, safe motherhood, antenatal and postnatal care, breast feeding, nutrition, legal awareness, career counseling, life skills, self defence, menstrual hygiene, etc.

women living in slum areas have received direct medical aid from of health camps. more than 20000 women and girls were given sanitary napkins and contraceptives to create awareness on menstrual and reproductive health. Special programmes focusing on the same were organised for school going girls across India

More than 10000 women benefitted from the initiatives covered under home visits by CIWT volutenteeer team at various locations around the country.

A special project on Vocational Skill Training on Tailoring and Beautician was initiated for young women. Besides imparting the skills, the women were also provided with sewing machines on completion of the course, as a first step in enabling them to have an independent and dignified livelihood.

DURING THE YEAR

CIWT initiated the Vocational Training Programme, as part of the ongoing community development programme.

The project was aimed at encouraging women and girls from the slums to enroll for skilled training course in tailoring and sewing, to help them have a dignified and independent livelihood. This was to provide a sustainable source of income to families

More than 500 women enrolled in our vocational training programme and successfully completed the course. To motivate and encourage the women in this new phase of their lives and give them a little extra support they were also gifted with a sewing machine each.

Most of the women who completed their courses have found jobs at tailoring shops and garment manufacturing factories, or have begun sewing work from home. There are many who have joined the programme after getting inspired from the success stories of the women who have now become independent, confident and able to merit a secure and dignified livelihood.

MORE THAN 500 women have successfully completed the vocational training programme

After successful completion of course ,we provided them sewing machine as an initial support for their new beginning

A convocation ceremony was held during which all the women received course completion certificates and were encouraged by the whole community, including dignitaries from Ministry of Small Medium Enterprises

DURING THE YEAR

Legal Awareness

Legal Aid means giving free legal services to the poor and needy who are unable to afford the Services of an advocate for the conduct of a case or a legal proceeding in any court, tribunal or before any Judicial authority CIWT organized various legal awareness programmes and held informative quizzes on various Acts namely Domestic Violence Act-2005, Acts on Stalking, Harassment at Workplace Acts, Criminal Amendment Acts-2013. Around 36 Awareness Sessions were organized in West Delhi, East Delhi, North Delhi and South Delhi and more than 1500 slum dwellers participated and many of them are enrolled for further assistance

Beautician Training

women form a significant proportion of India's workforce, they are largely concentrated in the informal sector. They are also, for the most part, engaged in vocations characterised by low earning and productivity, poor working conditions and no social protection. our beautician training programme, was launched in January 2013, with a view to help address these issues.6-month beautician training programme for women in beauty, skin and hair care, our beautician training program has grown significantly over the last few years and we are looking to ramp up these efforts into advance levels for the same.

ENTREPRENEURSHIP SKILL DEVELOPMENT

It was our honour and privilege to be a part of MSME (Ministry Of Micro, Small & Medium Enterprises). We are thankful to MSME for giving us this opportunity For organizing entrepreneurship and skill development program .

We are thankful to MSME who have inaugurated the entrepreneurship and skill development programme on Jute Products at one of our vocational Center
The training was comprehensive and included all necessary topics on jute products. This project not only strengthens the women in the local community but also help them earn additional income to earn a sustainable livelihood for them & their families.

After completion of this project, MSME (ministry of small medium enterprises) provided us the opportunity to showcase the jute products made by the girls and women who were enrolled in ESDP (Entrepreneur skill development program)at IITF (India international trade fair). This not only generates necessary income But it also helped them in exploring new export potential, exposure to new trends and stimulate new ideas.

We at care India welfare trust feels very motivated and hope MSME (Ministry of small ,medium ,enterprises) will provide us an opportunity again to participate at their various expo & exhibition so that we can showcase the excellent products made by the girls and women who belongs from the weaker section at our local community

CHANGE THAT INSPIRE US

We at Care India Welfare Trust believes that by empowering women we can empower whole community .women hold key to educate their children ,the next generation who will go on to shake the future of india

Geeta Devi one of the resides of chuna Bhatti mentioned that she was honoured to receive the certificate of ESDP and grateful for this opportunity.

She also said " (ESDP certificate helped me in earning credentials. I always dreamed of opening a business and becoming a successful business woman but my family has not supported me. Because of CIWT and MSME, I have been able to earn money by selling Jute products. MSME members visited CIWT vocational center on September 2017. At that time I have decided to pursue that course.

Thanks to CARE INDIA WELFARE TRUST for encouraging us and providing information about motivational schemes. Without a doubt, this course will play a key role in achieving my goal.

TOWARDS A HEALTHY BEGINNING

India's complex social system with layers of hierarchy result in health issues becoming a critical concern in development of women and girls from marginalised communities. through various health programmes, CIWT addresses the root cause of health inequities in the country, and works towards ensuring improved access to health and well-being for marginalised communities.

Our healthcare programmes aim to improve maternal, neonatal, and child health and nutritional status, reduce vulnerability to communicable diseases, combat non-communicable diseases and enhance the quality of life. By combining preventive, promotive, curative and rehabilitative health services, the programmes serve the disadvantaged, socially excluded and hard-to-reach population.

Our Health Camps aim to improve access to essential health services through delivering doorstep medical care and organising a bridging network with the public healthcare system. Also, the organisation has created a pool of frontline community health workers, who strive to address the crisis of human resources in the health sector by playing a substantial role in providing accessible and affordable services to the majority of the population.

HEALTH CAMPS

DURING THE YEAR

Our Health Camps are formulated to provide health care services to the marginalised communities in remote rural areas and slums through standalone camps. These camps are conducted with the help of important community stakeholders, government health departments, and specialist doctors such as Gynaecologists, Paediatrics, Ophthalmologists, Dentists and General Physicians.

A need-assessment survey is done to identify the locations and communities where healthcare is imminent . Extensive mobilisation is done in and around the areas through pamphlet distribution, announcements and posters, which results in greater footfall of patients in the camps. Women, children and the elderly are given special attention throughout the camps.

The health camps are customised as per the needs of the specific communities and their duration could range from one day specialised camps to 5-10 days intensive camps

A wide range of services are provided during Health Camps which include women & child health, ANC and PNC services, awareness sessions with women, free medical check-ups and medicine distribution, free laboratory tests for (HB, blood and urine routine tests, HIV, TB etc) and referrals for major cases.

Fumigation drives, health camps and lab tests were conducted to fight the onslaught of mosquito bred diseases malaria, dengue and chikungunya in Delhi NCR. The campaign reached out to over 5 thousand people in various slum areas.

Women and children formed nearly 60% of the total beneficiaries of our Health Camps

more than 5000 benefitted from Health camps conducted in Rajasthan for daily wage labourers and their families. Free of cost services including health check-ups by medical professionals, distribution of medicines and pathological tests were provided during the camps.

Special health camps for senior citizens were conducted in Delhi Ncr . The facilities available were general health check-up,, sugar test, and check-up for arthritis. Medicines were distributed free of cost to the beneficiaries after diagnosis.

Healthcare at doorsteps of Bichoon

Listed among the 250 most backward districts of the country, Bichoon in Rajasthan has a rural population of more than 80%. Living in remote villages, the socio-economically marginalised populace has very limited access to even the most basic amenities.

But for more than a year now, families of the most disadvantaged villages in Rajasthan have healthcare coming right at their doorsteps. Our health camps project dedicated to serve the district was launched in June 2017. Targeted to benefit over 5000 families, the project focuses on mother and child health.

As most of the people in the villages are small-time farmers and daily wage earners, they would never take a day off to visit the nearest health facilities that were kilometres away. Surviving from day to day was their biggest challenge and they believed everything else could wait. Illiteracy and lack of awareness further made them prone to ignorance. Through rigorous mobilisation activities, street plays, door to door visits and awareness drives, Our Health Camp were successful in enabling more and more people from the identified villages to avail of the doorstep healthcare services.

Medical diagnosis, pathological lab services, free of cost medicines and treatment is provided to the people at the mobile hospital. In case of serious ailments and advanced cases, referrals are made to the nearest public and private medical centres. With the aim of promoting a health-seeking behaviour in the communities, mothers, children and the elderly are provided special counselling and awareness sessions on vital health issues such as personal hygiene, sanitation, immunisation, and healthy eating. School Health programme ensured that school going children adopt the simple necessary practices such as hand washing, clean eating in their daily routines.

Our health Camps project was well accepted by the villagers and it was quite evident when the whole community gathered to celebrate the completion of one year of the project. Women sang folk songs and children performed, as whole villages came together to congratulate the doctors and paramedical team of the mobile hospital on their sincere efforts and good work.

DURING THE YEAR

Maternal Health Program

More Than 1000 women benefitted from the Maternal Health Programme which is an integral part of Smile on Wheels programme. Aimed at providing primary healthcare in the rural areas and urban slums, the programme uses its various networks with the village health communities to provide assistance during pregnancy and other issues like newborn and child health, newborn care at both public and private facilities. Behavioural change among the people in the community is encouraged through various counselling and sensitisation sessions. Mothers and expecting mothers are counselled at a regular basis on maternal and neonatal danger signs, nutrition for the mother and baby and healthy habits.

Hygiene Session

More than 50 Information Education and Communication sessions were conducted to create awareness in the community. To sensitise an entire community it is very important to start from the base i.e. the family. Men and women in a family should have equal responsibility of maintaining hygiene and sanitation. Under these sessions, parents are sensitised on how to maintain personal hygiene, keep their surroundings clean, the importance of having a toilet for the family and teaching the children good habits from early childhood more than 1000 men, women and children were sensitised through various mediums like group discussions, street plays, door to door visits etc

Dental Camp

We organised 10 dental health camps in slums around new Delhi, In these camps we efficiently check each and every individual for their dental diseases. The data of patient names and their diagnosis details are then maintained for future treatment, More than 1000 people screened and pepsodent dental kits were distributed for free.

THE IMPACT

More than 1000 school going children benefitted from our Health Programme that are conducted in local community

More than 5000 people received direct medical aid from our health camp and free medical clinic

An overall increase of around 30% from last year was recorded in the number of beneficiaries of CIWT healthcare programmes

More than 5000 pepsodent and dental kit were distributed at our dental camp
